PROJECTS

Online Fee Payment and Receipt Management System

Developed a web-based application to simplify fee payment and receipt management for students and administrators. Implemented secure user authentication, online payment processing, and automated receipt generation using Spring Boot and MySQL. Designed a responsive front-end with HTML and CSS to ensure a smooth user experience. The system improves efficiency by reducing manual work and providing real-time transaction tracking.

MERNSTACK:

This project is a MERN stack application using React, Node.js, Express, and MongoDB. The backend is hosted on AWS, enabling smooth cloud-based communication between the frontend and database.

CERTIFICATIONS

C Programming|Udemy	**2024**
Data Structures and Algorithms using C and C++|Udemy	**2025**

ACHIEVEMENTS

Poster Prresentation won 1st price	**2024**

CODING PROFILES

Leetcode :Solved problems | <u>Link</u>
SkillRack :Solved 520+ problems \|Received 4 certificates\| <u>Link</u>
